**DECLARATION OF KERRY D. VANDELL  
IN OPPOSITION TO THE AVIATION DEFENDANTS'  
MOTION FOR SUMMARY JUDGMENT BASED ON CPLR 4545(c)**

KERRY D. VANDELL, pursuant to 28 U.S.C. §1746, declares under the penalties of perjury that the following is true and correct:

**I. QUALIFICATIONS**

1. I am the Director of the Center for Real Estate and a Professor of Finance at the Paul Merage School of Business, University of California - Irvine. Prior to joining the faculty at UC Irvine, I was most recently the Tiefenthaler Chaired Professor of Real Estate and Urban Land Economics at the University of Wisconsin-Madison and the Director of the Center for Urban Land Economics Research. I also served as the Chairman of the University of Wisconsin-Madison's Department of Real Estate and Urban Land Economics and as the Director of the Bolz Center for Arts Administration. I received my B.A. and Masters in Mechanical Engineering degrees from Rice University, my Masters in City and Regional Planning from Harvard University, and my Ph.D. in Urban Studies and Planning from M.I.T. While at M.I.T., I was the Charles Abrams Fellow at the Joint Center for Urban Studies. I have also taught at Harvard University, the University of California-Berkeley, and Southern Methodist University in Dallas and served as a visiting scholar at the University of Southern California and Hong Kong University.

2. In addition to my teaching responsibilities, I have been active in other academic activities related to real estate markets and finance for the past 32 years. Examples of these activities include serving as President of the American Real Estate and Urban Economics Association, co-editing the Association's Journal, *Real Estate Economics*, serving as an Academic Fellow of the Urban Land Institute, serving as a member of the Faculty and Board of the Homer Hoyt Advanced Studies Institute, and serving as a member of the Federal National Mortgage Association's Housing Policy Advisory Board. I have also served as a member of several journal editorial boards, including the *Journal of Real Estate Finance and Economics*, the *Journal of Real Estate Research*, the *International Real Estate Review*, *Land Economics*, the *Journal of Housing Research*, and *Housing Policy Debate*.
3. At UC Irvine, my primary teaching responsibilities are currently a graduate survey course in real estate analysis and a graduate course in mortgage-backed securities and structured debt. Over the years, I have taught virtually every course in the real estate curriculum at both the undergraduate and graduate levels. These include courses in real estate valuation, real estate finance, urban development and planning, urban economics, real estate investments, and housing economics and public policy, as well as serving as the academic coordinator in charge of the nation's first graduate level academic program specializing in applied real estate securities analysis. My research and consulting activities have been in the areas of real estate investment; urban, real estate, and environmental economics; valuation theory and practice; housing economics and policy; and mortgage finance.
4. A partial list of recent consulting clients includes (but is not exclusive to) the Ford Foundation, the U.S. Department of Housing and Urban Development, the U.S. Department of Justice, the General Accounting Office, the State of Wisconsin Investment Board (which manages the investment portfolio of the State of Wisconsin's retirement system), the National Association of Realtors, the Federal Home Loan Bank Board, the

Real Estate Research Institute, the Credit Union National Association, Trout Unlimited, the Mortgage Bankers Association of America, the Urban Land Institute, the Land Court of Queensland Australia, the Redevelopment Authority of the City of Milwaukee, Fannie Mae, the Travelers Realty Investment Company, the National Multi Housing Council, Salomon Brothers, Inc., Ameritech Michigan, the International Council of Shopping Centers, the National Association of Counties, the U.S. Conference of Mayors, the City of Madison Department of Economic Development, Downtown Madison Inc., and Future Madison, Inc. Until I recently relocated to Orange County, CA, I also sat on the boards of ChrisKen Realty Trust (a private multifamily REIT based in Chicago), the Park Bank, Hilldale, Inc. (a regional mall), and the Board of Trustees of Funds and Endowments of the Episcopal Diocese of Milwaukee.

5. A copy of my curriculum vitae, which includes a list of my publications during the last ten years and expert testimony at trial and/or deposition during the past four years, is attached as Exhibit 29 to this declaration.

## **II. PURPOSE OF DECLARATION**

6. I have been requested to provide a preliminary opinion on the proper methodology for calculating the economic damages suffered by the plaintiffs World Trade Center Properties ("WTCP"). I have not been asked and I do not provide empirical quantifications of such damages since that is not called for yet and this is not an expert report. This declaration is not intended to serve in lieu of an Expert Report prepared pursuant to Fed R. Civ. P. 26. A formal Rule 26 report may be provided at an appropriate time in this litigation. I have reviewed the Aviation Defendants' Motion for Summary Judgment, their supporting documents, pleadings in this action, the other declarations submitted in opposition to the Aviation Defendants' motion, media reports and press releases regarding the lease of space within World Trade Center buildings 1, 2, 4 and 5 by the Port Authority to WTCP

and relevant research literature. All of the materials I rely upon in support of this declaration are of a type reasonably relied upon by experts in the field.

7. I will proceed in section III to provide background information on the transaction that led to WTCP's leases of space within the World Trade Center complex within buildings 1, 2, 4 and 5 and to identify the specific property interest held by WTCP. In section IV, I describe the damages calculation methodology and considerations that must be taken into account in calculating damages to WTCP. Section V focuses on certain unique circumstances of the World Trade Center complex that contribute to its economic value in the market as distinct from a "typical" income-producing property and ownership structure. In section VI, I discuss WTCP's obligation to replace the World Trade Center buildings, and finally, in section VII, I provide a summary of my conclusions.

### **III. BACKGROUND**

#### **A. Construction of the World Trade Center Complex and Entry into WTCP's Net Leases**

8. Construction of the World Trade Center complex commenced in 1965; the total cost in nominal dollars was approximately \$1 billion.<sup>1</sup> Given inflation in construction costs, this represents approximately \$10 billion in today's dollars.<sup>2</sup>
9. The Aviation Defendants claim that certain rental payments under the Net Leases were "valued" by the Port Authority at approximately \$2.8 billion. However, as discussed below, this amount does not represent the value of the leasehold to WTCP or the value of the buildings themselves within the

---

<sup>1</sup> See Exhibit 30.

<sup>2</sup> See Exhibit 30.

World Trade Center complex. It does not even represent the value of the Net Leases to the Port Authority. While it purports to reflect the present value of certain rental payments under the Net Leases from WTCP to the Port Authority, it does not take into consideration other expenses and additional obligations that are borne by WTCP that benefited the Port Authority.

10. Moreover, even if the \$2.8 billion could be considered the “value” of the transaction, it certainly cannot be considered “market value” as that term is generally understood. That is because, for a transaction price to be considered a “market value,” the transaction must meet certain criteria not present in the World Trade Center leasehold transaction.
11. While there are several definitions of “market value,” it is generally understood to mean the amount for which a property should be exchanged between typically motivated willing buyers and sellers in an arm’s-length transaction where neither party is under undue duress.<sup>3</sup> The Port Authority was not a profit-maximizing lessor,<sup>4</sup> and was under some political pressure to lease certain portions of the World Trade Center operations.<sup>5</sup> Even if one were to accept that the value to the Port Authority of the lease transaction between WTCP and the Port Authority was only \$2.8 billion and even if one were to accept as facts only the documents contained in the Aviation Defendants’ summary judgment motion, there are a number of reasons why the transaction would not qualify as a “market value” transaction as that term is generally understood. Most importantly, the Port Authority had, and has, broader goals than maximizing its income, including promoting the public interest in the World Trade Center complex “to the Port Authority

---

<sup>3</sup> See, for example, Appraisal Institute, *The Appraisal of Real Estate*, 13<sup>th</sup> edition, pp. 22-25, 305.

<sup>4</sup> Declaration of Alexander Garvin in Opposition to the Aviation Defendants’ Motion for Summary Judgment Based on CPLR 4545(c) dated August 14, 2008 (“Garvin Declaration”), ¶16.

<sup>5</sup> Garvin Declaration, ¶¶47-48.

and to the people of the region.”<sup>6</sup> Thus, the lessor was not “typically motivated” and the price of the lease transaction would not constitute “market value.”

## **B. Elements of the Net Leases**

12. WTCP holds 99-year leasehold interests in space within World Trade Center Buildings 1, 2, 3 (formerly known as 5), and 4 of the World Trade Center complex. The Aviation Defendants allege that the present value of these buildings is \$2.8 billion, consisting of the following elements:<sup>7</sup>

- a. An upfront payment to the Port Authority of \$616 million payable upon closing, which included a \$491 million payment by WTCP for the Net Leases of space within World Trade Center 1, 2, 4, and 5 (and the subgrade space) and a \$125 million payment by Westfield LLC for the retail mall.<sup>8</sup>
- b. A stream of fixed base rental payments that the Aviation Defendants claim has a present value of \$2.53 billion. The present value of these cash flows (Tranche A in years 1-99 and Tranche B in years 1-30) to the Port Authority was based on discount rates of 8 percent and 12 percent, respectively.
- c. A 99-year stream of participating rental payments that the Aviation Defendants claim has a present value of approximately \$65 million, discounted at a rate of 10 percent.
- d. When the Aviation Defendants’ estimated present value of Westfield’s portion of the lease payment obligations of \$395 million is netted out,<sup>9</sup> the total present value to the Port Authority of the payments from WTCP was estimated by the Aviation Defendants to be approximately \$2.8 billion based on the various discount rates selected as of April 2001.

13. In addition to the contracted lease payments (which WTCP was obligated to pay regardless of the productivity of the property and even if it were

---

<sup>6</sup> Declaration of Desmond T. Barry dated April 26, 2001, (“Barry Declaration”), Exhibit A, p. 161.

<sup>7</sup> Barry Declaration, Exhibit B and Q, p. 92.

<sup>8</sup> Barry Declaration, Exhibit W, p.8.

<sup>9</sup> Barry Declaration, Exhibit P.

destroyed<sup>10</sup>), there were a number of additional obligations that would affect the value of the Net Leases to the Port Authority and the cost of the Net Leases to WTCP. These include the following:

- a. The lessee was obligated to maintain the property in an optimally productive manner at all times.<sup>11</sup>
- b. The lessee was responsible for all taxes, operating and maintenance costs, capital improvements, leasing, and property and asset management.<sup>12</sup>
- c. The lessee was obligated to return the property to the Port Authority at the end of the 99-year lease term in an acceptable operating order, appearance, and condition.<sup>13</sup>
- d. In the event of the destruction of the premises, the lessee was obligated to “rebuild, restore, repair and replace the Premises ... to the extent feasible, prudent and commercially reasonable, with the plans and specifications for the same as they existed prior to such damage or destruction or with the consent in writing of the Port Authority . . . make such other repairs, replacements, changes or alterations as is mutually agreed to by the Port Authority and the Lessee.”<sup>14</sup> In other words, WTCP could not simply pay the base rent without replacing the property in a timely fashion.<sup>15</sup>

14. As I discuss below, the \$2.8 billion amount advocated by the Aviation Defendants is not the economic value of the World Trade Center buildings. It is also incorrect as a measure of damages to the plaintiffs.<sup>16</sup> The \$2.8 billion fails to take into account damages to WTCP’s leasehold interest and

<sup>10</sup> Barry Declaration, Exhibits L § 15.1.4, M § 15.1.4, N § 15.1.4, and O § 15.1.4.

<sup>11</sup> Barry Declaration, Exhibits L § 13, M § 13, N § 13, and O § 13.

<sup>12</sup> Barry Declaration, Exhibits L §§ 6.4, 6.7-6.11, 13.1, M §§ 6.4, 6.7-6.11, 13.1, N §§ 6.4, 6.7-6.11, 13.1, and O §§ 6.4, 6.7-6.11, 13.1.

<sup>13</sup> Barry Declaration, Exhibits L §§ 3, 30, M §§ 3, 30, N §§ 3, 30, and O §§ 3, 30.

<sup>14</sup> See, for example, Barry Declaration, Exhibit L § 15.1.

<sup>15</sup> See, for example, Barry Declaration, Exhibit L §§ 15.1, 15.1.4. The Aviation Defendants have argued that WTCP did not actually have the obligation to replace the property and could simply walk away, because it would be uneconomical to replace the property (*i.e.*, the replacement cost would exceed the market value of the replacement). I address the fallacy of this claim, from an economic perspective, below.

<sup>16</sup> The \$2.8 billion was as of April 26, 2001 (*See* Barry Declaration, Exhibit B). The date of the destruction of the buildings was September 11, 2001. To the extent that risk and the market environment may have changed between April 26 and September 11, 2001 warranting a different discount rate, the present value would change.

damages to the Port Authority's residual claim on the World Trade Center property through its reversionary interest. Furthermore, as discussed above, and contrary to the claims of the Aviation Defendants,<sup>17</sup> the \$2.8 billion is not even the value to the Port Authority of the Net Leases for space within the World Trade Center buildings. This is because this amount fails to take into account WTCP's obligations over and above the lease payments under the Net Leases as explained above with some examples of obligations not taken into account.

15. The relevant measure of one aspect of the damages to WTCP itself (exclusive of replacement costs incurred and to be incurred) is the value of the leasehold interest to WTCP and not the value to the Port Authority of the Net Leases, which is an expense to WTCP. If \$2.8 billion were the entire value of the Net Leases both to the Port Authority and to WTCP, the transaction would have made no sense. WTCP had the expectation of making a profit on the leases over and above the payments and other obligations WTCP agreed to pay and undertake, respectively.
16. The Net Leases' terms, which had built into them some profit opportunity to WTCP in order to make the Net Leases attractive to WTCP, also permitted WTCP some discretion as to managing, improving, and leasing the property that created significant additional opportunity for WTCP to realize previously unrealized value that would not exist under full management by the Port Authority. This would increase the investment value of the leasehold interest to WTCP (and, in fact, to any experienced and efficient private operator). Thus, anticipated market rents and net operating income levels significantly above historic trends under the Port Authority could rationally be expected.

---

<sup>17</sup> Aviation Defendants' Memorandum of Law in Support of Their Motion for Summary Judgment Dismissing All Claims by World Trade Center Properties for the Destruction of WTC 1, 2, 4, and 5, p. 28.

**IV. THE PROPER METHODOLOGY FOR CALCULATING DAMAGES AND ELEMENTS OF THE DAMAGES CALCULATION**

17. The proper methodology for calculating the economic damages suffered by WTCP to its leasehold interests is to calculate the difference between WTCP's cash flows expected but for and as a result of the attacks of 9/11/01, expressed in present value terms discounted at risk adjusted rates as of that date.
18. The first step is to calculate the present value of WTCP's cash flows as if the attacks had not occurred. This should be represented as a schedule of expected revenues and costs (*i.e.*, the net operating income or before-tax cash flow on an after-financing basis) over the 99 years of the leases, as if September 11 had not occurred, discounted to 9/11/01 at the appropriate discount rate or rates.
19. This is then followed by a second schedule of actual and expected revenues and costs, taking into account the events of 9/11, including the costs to rebuild the properties and the absence of revenues for a substantial period of over ten years. These revenues and costs would be discounted back to 9/11/01 at the appropriate discount rate or rates.
20. In both calculations, the discount rate would incorporate both the time value of money and the risks associated with the cash flows as well as the effects of liquidity and market conditions. The discount rates used to calculate cash flows but for the events of 9/11 and considering the events of 9/11 may be different. The discount rates would have a significant impact on the present value calculation.
21. The difference between the projected present values would be the economic damages incurred by WTCP, because it would put WTCP in the same financial position as it would have been in, but for the events of 9/11.

22. The methodology for calculating cash flows expected, considering the events of 9/11, must take into consideration any and all changes in the expected net cash flows (some of which might be positive and some negative) associated with the replacement buildings relative to the expected net cash flows from the original World Trade Center buildings. This approach would avoid any unintended windfall to WTCP from the construction of new buildings, which might result in higher revenues as a result of any potential over-improvement.
23. A careful, unbiased discounted cash flow analysis reflecting the but-for cash flows and the cash flows calculated considering the events of 9/11 as described above, would yield a quantification of economic damages suffered by WTCP, including replacement costs and lost profits.
24. The Aviation Defendants claim that damages to WTCP are capped at \$2.8 billion, which, as I have demonstrated above, may be a measure of part of the value of the Net Leases to the Port Authority and a cost to WTCP, but does not represent the damages to WTCP at all. In fact, \$2.8 billion represents neither damages to WTCP nor the economic value of the World Trade Center buildings themselves. In considering damages and the lost productivity of the structures themselves, one must consider that the economic value of the World Trade Center buildings also includes value related to the broader “public purpose” objectives of the public governmental owner, the Port Authority. The World Trade Center complex had a significant economic development impact on Lower Manhattan and the New York region, which provided substantial additional economic value.

**V. GIVEN THE ECONOMIC VALUE OF THE WORLD TRADE CENTER COMPLEX RELATIVE TO THE RECONSTRUCTION COSTS, REBUILDING WOULD NOT BE UNECONOMICAL**

25. The World Trade Center complex and WTCP's interest in it are fundamentally different from a traditional office building development and leasehold investment. One cannot speak of "market value" concepts associated with the World Trade Center complex in the traditional textbook appraisal context, since the project was developed – and has always existed – as an asset with significant "public purpose" value that extends beyond its private economic value in the marketplace.
26. The idea behind the World Trade Center complex began with the Downtown Lower Manhattan Association, and, starting in 1961, was adopted and developed by the Port Authority.<sup>18</sup> It was much larger in scale than the private market could support during the period it was developed. The serious decline in the real estate market in Lower Manhattan relative to Midtown in the 1950s was among the factors that provided the impetus for the development of the World Trade Center complex, as private development efforts such as the Chase Manhattan Bank Building in 1960 had done little to revive Lower Manhattan.<sup>19</sup> Thus, the World Trade Center complex was intended to serve, and did serve, as an economic engine for Lower Manhattan.
27. Even today, given the improvement in the economic fortunes of New York City since the 1970s, a project of the scale of the World Trade Center complex would be infeasible from a purely private-sector economic perspective.
28. This implies that the replacement cost of the World Trade Center complex then, as now, would be expected to be greater than the private value created

---

<sup>18</sup> Garvin Declaration, ¶¶ 27, 30-33.

<sup>19</sup> Garvin Declaration, ¶¶ 23, 25-26.

by way of capitalization or discounting of the economic net rents able to be achieved.

29. Why then was the World Trade Center complex built? The primary purpose of the Port Authority in undertaking the project was to create a structural presence that could serve as a catalyst and incubator for economic development in Lower Manhattan, and New York City and the Port of New York and New Jersey as a whole.<sup>20</sup> The World Trade Center complex was expected to provide an “anchor” for activity in the area. As noted above, World Trade Center 1 and 2 (the “Twin Towers”) were the tallest buildings in the world at the time, and altogether the project was the largest real estate development in the world in terms of square footage.
30. Can the magnitude of such economic development benefits be determined empirically? Theoretically, this can be done (and is, in fact, done) through economic impact studies using multiplier or input-output analysis. For example, a 2003 study commissioned by the Lower Manhattan Development Corporation projected that during construction, “the World Trade Center would generate \$14.02 to \$15.42 billion in total economic output in New York City, and an average of 7,760 to 8,530 full-time equivalent jobs each year for thirteen years” and once completed “the total impact on the City’s economy from operations at the World Trade Center site and off-site visitor spending will include a \$15.70 billion increase in *annual* economic output and approximately 77,000 full-time equivalent jobs.”<sup>21</sup> A second study, by the Office of the Comptroller of the City of New York, projected that the ongoing adverse economic impact on New York City revenues due to the absence of the World Trade Center complex

---

<sup>20</sup> The Garvin Declaration provides a detailed historical accounting of the public purpose objectives of the development of the World Trade Center complex. Such an objective is not uncommon for governmental institutions.

<sup>21</sup> Appleseed, “Economic Impact of Redeveloping The World Trade Center Site,” October 30, 2003, pp. 4-5 (emphasis added).

in fiscal years 2002 and 2003 would be \$45 billion to 60 billion.<sup>22</sup>

Numerous additional studies also found substantial economic impact associated with the rebuilding of the World Trade Center complex.<sup>23</sup>

31. The above cited studies suggest, in the case of the World Trade Center complex, that the effect on subsequent development in Lower Manhattan was so strong, and the magnitude of the direct economic effects so large (even if allocated among a number of contributing sources), one could be confident that the dollar value of these effects would be significantly greater than the replacement cost of the structures, even ignoring the additional economic benefits for the City and Region beyond Lower Manhattan.
32. There is a direct economic impact parallel between the role the original World Trade Center complex played in Lower Manhattan and the role an anchor department store plays in enhancing the value of a regional shopping mall. It is well established in the shopping center industry that the anchor typically pays lower rents or gets its space free, or at reduced cost (if owning), in exchange for locating in the center. Its strong customer-generating power brings in enough additional shoppers to enhance the rents obtainable from the in-line non-anchor stores by an amount sufficient to more than make up for the subsidy. The anchor thus generates a positive externality, or spillover. If one were simply asked to value the anchor alone to the landlord by capitalizing the rent the anchor pays, the result would be a figure below its true value to the landlord/mall because of the positive externality/spillover (*e.g.*, incremental rents generated from other tenants are

---

<sup>22</sup> City of New York, Office of the Comptroller, "The Impact of the September 11 WTC Attack on NYC's Economy and City Revenues," October 4, 2001, p. 8.

<sup>23</sup> See, for example, Reis, "Evaluating the Impact of the World Trade Center Disaster on the New York Office Leasing Market," October 2001; McKinsey & Co., "Economic Impact of the Attack on the Real Estate Sector;" Zandi, Mark, "Attack on America: Fallout on the U.S. Economy," Economy.com, September 17, 2001; Deutsche Bank Alex Brown, "Metro Impact of September 11<sup>th</sup> Attacks," September 25, 2001; Grubb and Ellis Research, "NYC's Office Market – A Post 9-11 Update," December 2001; and, ATKearney, "Rebuilding the WTC: Economic Impact Analysis, January 21, 2002.

external benefits of the anchor to the landlord).<sup>24</sup> Further, the replacement cost of the anchor improvements, including the cost of the space, would be greater than this market value calculation. To properly value the economic contribution of the anchor would require recognition of the incremental rents it is responsible for generating among the in-line tenants.<sup>25</sup>

33. When applied to the World Trade Center case, the concepts discussed above would consider the entire Lower Manhattan real estate market to be the equivalent of the “mall” and the World Trade Center development to be the anchor. Although rents for the World Trade Center alone might result in a traditional market value calculation insufficient to justify development, the impact of the project on future demand, hence rents and values and additional taxes, in the broader market would create enough economic value to more than make up for any rent deficiency of the project.
34. The conclusions from this analysis include the following: (1) an inapplicable narrow, private-market based calculation of the “market value” of the World Trade Center involving the discounting of expected net rents would be expected to be lower than the replacement cost of the improvements; and (2) the correct total economic value of the World Trade Center buildings leased by WTCP is significantly greater than the replacement cost, owing to the substantial economic development benefits

---

<sup>24</sup> See, for example, B.P. Pashigian and E. D. Gould, “Internalizing Externalities: The Pricing of Space in Shopping Malls,” *Journal of Law and Economics*, April 1998, pp. 115-142.

<sup>25</sup> Additional examples abound of such spillover effects in the real estate market resulting in cross-subsidization of rents and having an influence on aggregate market value. Consider a golf course acting as the centerpiece of a new residential development, around which homes would be built. Alone, the revenues from golf memberships and green fees would be insufficient to justify its development. However, the spillover effects generated by the presence of the course upon increased prices for lots abutting the course or enjoying the presence of the nearby amenity more than offset its cost. Similarly, tenant-serving retail operations within a large office building frequently do not pay their way in terms of rent levels based upon their level of sales. However, the fact that tenants value their presence makes them more willing to pay higher rents for their presence at the margin and means retail operations contribute indirectly their full economic value to the office development.

35. Given the greater public purpose value of the World Trade Center, the decision (and obligation) of WTCP to rebuild does not represent an uneconomical effort.

## **VI. WTCP'S OBLIGATION TO REPLACE THE BUILDINGS**

36. It is argued by the Aviation Defendants that WTCP is not obligated by the terms of the Net Leases to replace the properties.<sup>26</sup> The Aviation Defendants seem to be arguing that WTCP would never realize a competitive return on its investment if it were to incur the cost of replacement of the structures and then lease them at market rates. This argument fails to consider the value that accrues to the residual owner of the World Trade Center, the Port Authority. By the Aviation Defendants' reasoning, the World Trade Center would never have been built in the first place.
37. The argument also overlooks a number of other issues. For example, whether a default on its replacement obligation would be the best choice economically for WTCP (even at this point ignoring the existence of value from broader economic development benefits). If WTCP were to default on its obligation to replace the structures, it would be declared in default, which would result in: (a) the forfeiture of the over one-half billion dollars in rental payments already made by WTCP prior to September 11, 2001; (b) the forfeiture of all monies collected from WTCP's insurers; and (c) the loss of the limitations on its liability and the liability of its affiliated entities and

---

<sup>26</sup> Aviation Defendants' Memorandum of Law in Support of Their Motion for Summary Judgment, p. 19.

individuals under ATSSSA as a result of willfully failing to rebuild.<sup>27</sup>

Moreover, WTCP would still be obligated by the terms of its lease to pay base rent for the full term of the leases.

38. WTCP is, in fact, obliged under the terms of the lease to replace the buildings “promptly” and to replace the buildings “substantially in accordance, to the extent feasible, prudent and commercially reasonable, with the plans and specifications for the same as they existed prior to such damage or destruction or with the consent in writing of the Port Authority . . . make such other repairs, replacements, changes or alterations as is mutually agreed to by the Port Authority and the Lessee.”<sup>28</sup> It is in the economic interest of WTCP to replace the buildings as soon as possible to generate rental income to offset the lease payments it is obliged to pay to the Port Authority.
39. A decision by WTCP to default on its leasehold obligations would create additional costs beyond those discussed above, including negative reputational effects for WTCP. Indeed, the only party that would immediately benefit from a default by WTCP would be the Aviation Defendants, and the Port Authority would then prosecute its claim for replacement costs.
40. Regardless of whether WTCP replaces the structures or the Port Authority does it, the damages exist, and it is economically rational that the buildings be replaced.

## VII. SUMMARY OF CONCLUSIONS

41. A number of issues have been raised by the Aviation Defendants in this case concerning the appropriate methodology to calculate compensable damages and the extent to which WTCP is obligated to replace the World Trade Center structures. My analysis has certain implications for several of these issues. Specifically:

- The proper interest held by WTCP is the leasehold interest specified in the Net Leases entered into with the Port Authority as of July 16, 2001. The \$2.8 billion is not the value to WTCP of its leasehold interests. It is also not the value to the Port Authority of its leased fee interest as the owner of the destroyed buildings or the value to the Port Authority as the owner of the reversionary interest.
- The damages suffered by WTCP are properly calculated by projections of the anticipated revenues and costs associated with WTCP's leasehold interest just prior to the events of 9/11 and the revised anticipated revenues and costs (including the costs to rebuild the properties) just after the events of 9/11, discounted back to the time of the event at appropriate discount rates.
- Because of the special "public" role intended for the World Trade Center complex as a catalyst for future economic development in Lower Manhattan, there must be special considerations given when estimating its economic value.
  - These considerations are comparable to those accorded any complex property interests which involve a spillover of benefits to other property interests beyond the subject property itself. Such spillover benefits must properly be included in considering total economic value of the subject property.
  - In light of the public purpose of the World Trade Center, the project was appropriately developed at a time and at a higher density than would have been appropriate if only private-market considerations were relevant. This means the replacement cost of the buildings, including at the specific site, is greater than the private-market value of the project as determined by discounting or capitalizing its net rental stream. It also means that the full economic value of the project is in excess of its replacement cost.
  - Thus, even if the Court were to apply the test the Aviation Defendants advocate (and I am not opining on the correct approach

to allowing WTCP to recover its damages under the law of New York), the cost of replacement of the World Trade Center buildings with properties of comparable utility and functionality would represent the “lower of two” values: replacement cost vs. diminished market value, where “market value” is the full and proper economic value contributed by the buildings as part of the World Trade Center complex.

Dated: August 15, 2008  
Irvine, California

Laguna Beach, CA 92651

Phone: (949) 715-1333

**Personal Data**

Date of Birth: January 8, 1947

Married: Deborah Lowe Vandell, Professor and Chair, Department of Education, University of California - Irvine  
Two children - Colin Buckner born October 4, 1979, Ashley Elizabeth born March 9, 1985

**Education**

Ph.D. Massachusetts Institute of Technology, 1977  
(Urban Studies and Planning)  
Dissertation: Alternative Mortgage Instruments: Their Distributional Effects on Homeownership, Housing Consumption, and the Use of Mortgage Credit  
Chairman: Arthur P. Solomon

M.C.P. Harvard University, 1973 (City and Regional Planning)

B.A./M.M.E. Rice University, 1970 (Mechanical Engineering)

**Honors and Awards**

- 2007 American Real Estate Society, *Journal of Real Estate Research* Legacy Award for Best Paper (Voted by the Board of the *JRER*, for Ruslan Koesman, James D. Shilling, and Kerry D. Vandell, "How Tax Credits have Affected the Rehabilitation of the Boston Office Market," *Journal of Real Estate Research*, Volume 28, Number 4, 2006.)
- 2005 Second Place, American Real Estate Society Competitive Paper Award for Best Paper published in the *Journal of Real Estate Research* (Voted by the membership of ARES, for Charles Carter and Kerry D. Vandell, "*Bid Rent vs. Agglomeration Economies as Alternative Theories of Store Location within Shopping Centers.*")

- 2004 Outstanding Paper Award, Appraisal Institute, (for Tsong-Yue Lai, Kerry D. Vandell, and Ko Wang, "Estimating Property Value by Replicating One")
- 2004- Member Manufactured Housing Council, Urban Land Institute, Washington D.C. (invited)
- 2003 George Bloom Award, presented by the Officers and Directors of the American Real Estate and Urban Economics Association "for outstanding contributions to the field of real estate."
- 2002- Board of Directors, Asian Real Estate Society (elected)
- 2002-06 Co-Editor, *Real Estate Issues* (invited, official journal of the Counselors of Real Estate)
- 2000 First Place, Financial Management Association Competitive Paper Award for Fixed Income Research, sponsored by the Fixed Income Analysts Society (for Qiang Fu, Michael Lacour-Little, Kerry D. Vandell, "Commercial Mortgage Prepayments under Heterogeneous Prepayment Penalty Structures")
- 2000- Counselors of Real Estate (CRE) (invited)
- 2000-04 Research Advisory Task Force, International Council of Shopping Centers (invited)
- 2000-04 Director, the Center for Real Estate Enterprise Development (Centerprise) (invited)
- 1999 Recognized in *Business Week Guide to the Best Business Schools*, Sixth Edition, as one of ten outstanding faculty at the U.W.-Madison School of Business
- 1999- Research Committee of the National Realty Committee (now the Real Estate Roundtable) (invited)
- 1999- Editorial Board, *Journal of Real Estate Research* (appointed)
- 1998-2003 Fellow, Member Retail Development Council, Urban Land Institute, Washington, D.C. (invited)
- 1999 Editorial Board, *International Real Estate Review*
- 1998-03 Member, Commercial/Retail Development Council, Urban Land Institute, Washington, D.C. (invited)
- 1996-06 Named to Lorin and Marjorie Tiefenthaler Chair in Real Estate and Urban Land Economics (vacated when joined faculty at University of California – Irvine)
- 1994 Robert A. Jerred Award for Distinguished Service to the School of Business, University of Wisconsin - Madison
- 1994-96 Research Committee, Urban Land Institute, Washington, D.C. (invited)
- 1993-06 Board of Directors and Associate Dean, Homer Hoyt Institute of Advanced Studies in Real Estate and Urban Land Economics (elected)
- 1992-98 Fellow, Member Urban Development/Mixed-Use Council, Urban Land Institute, Washington, D.C. (invited)
- 1992-2003
- 2006- Board of Editors, *Journal of Housing Research*
- 1992- Office of Housing Research Advisory Board, Federal National Mortgage Association
- 1991-97 Co-Editor, *Journal of the American Real Estate and Urban Economics Association* (now *Real Estate Economics*)(elected)
- 1991- Who's Who in America
- 1991 President, American Real Estate and Urban Economics Association (elected)
- 1990 First Vice President, American Real Estate and Urban Economics Association
- 1989 Who's Who in Finance and Industry
- 1989- Member of the Faculty, Homer Hoyt Advanced Studies Institute (invited)
- 1989 Second Vice-President and Program Chairman, American Real Estate and Urban Economics Association (invited)
- 1988- Fellow, School of Advanced Studies in Real Estate and Land Economics of the Homer Hoyt Advanced Studies Institute (invited)
- 1988 Real Estate Consultants Advisory Committee, Salomon Brothers, Inc., New York City (invited)
- 1985 Faculty Research Excellence Award, Edwin L. Cox School of Business, SMU

1983-97 Board of Directors, American Real Estate and Urban Economics Association, re-elected 1986 for three-year term. Continued ex-officio as President, Ex-President, and Co-Editor of Journal

1982 Awarded Tenure, Edwin L. Cox School of Business, SMU

1980- Editorial Board, *Journal of the American Real Estate and Urban Economics Association*

1979 Faculty Research Excellence Award, Edwin L. Cox School of Business, SMU

1979 Regional Finalist, White House Fellows Program

1979-80 Young Associates Council, Society of Real Estate Appraisers

1978 Finalist, Faculty Research Excellence Award, Edwin L. Cox School of Business, SMU

1975-76 Charles Abrams Fellow, Joint Center for Urban Studies of M.I.T. and Harvard

1971-74 National Science Foundation Fellow

1970 B.A. Cum Laude

1970 Outstanding Senior Engineering Student

1970 Hugh Scott Cameron Award

1970 Who's Who in American Colleges and Universities

1969-70 Brown Engineering Award

1969-70 Engineering Alumni Scholarship

1968 Tau Beta Pi National Engineering Honorary Society

1968 Sigma Tau National Mechanical Engineering Honor Society

1967-69 John B. Warren, Jr., Scholar

1965-67 William Marsh Rice Scholar

1965-66 National Honor Society Scholar

1965-66 Degree of Honor Scholar

### **Professional Experience**

2006- Professor of Finance and Director of the Center for Real Estate, the Paul Merage School of Business, University of California, Irvine

2004-05 Visiting Scholar, Lusk Center for Real Estate, University of Southern California

2000-05 Executive Director, Bolz Center for Arts Administration, University of Wisconsin-Madison

1997 Visiting Professor, Hong Kong University Department of Real Estate and Construction

1997-06 Affiliated Faculty, Institute for Environmental Studies, University of Wisconsin-Madison

1996-06 Lorin and Marjorie Tiefenthaler Professor of Real Estate and Urban Land Economics, University of Wisconsin-Madison (endowed Chair)

1990-2004 Director, Center for Urban Land Economics Research, University of Wisconsin-Madison

1989-93 Professor and Chairman - Department of Real Estate and Urban Land Economics, University of Wisconsin-Madison

1988-89 Visiting Professor - University of California, Berkeley (Real Estate and Urban Economics)

1986-89 Professor and Chairman - Department of Real Estate and Urban Land Economics, Southern Methodist University

1985-86 Visiting Associate Professor - Harvard University (Urban Design)

1980-86 Associate Professor - Southern Methodist University

1976-80 Assistant Professor - Southern Methodist University

1970-71 Associate Petroleum Engineer - Exxon Co. USA, Houston, Texas

#### **Funded Research and Other Programmatic Initiatives**

- |      |  |
|------|--|
| 2001 | \$34,375. International Council of Shopping Centers for an extension of a project evaluating the potential impact of e-Commerce penetration on the retail market and sales tax receipts.   |
| 1999 | \$20,000. National Association of Realtors for an evaluation of the impact of technology on real estate, presented at the fall <i>Transact 2000</i> Conference in Chicago (with Richard Green)   |
| 1999 | \$63,853. International Council of Shopping Centers, U.S. Conference of Mayors, National Association of Counties, for an evaluation of the potential impact of e-Commerce penetration on the retail real estate market and sales tax receipts (U.W.-Madison portion of grant, co-investigator Henry Pollakowski of MIT). |
| 1998 | \$50,500. Ford Foundation for "An Evaluation of the Potential of Transforming the Homeownership Tax Credit to Overcome Down Payment Constraints" (my portion of a larger grant). Attended and made presentation at a meeting of all researchers on the project at Ford Foundation headquarters in New York in July.      |
| 1998 | \$10,000. Real Estate Research Institute for an evaluation of the impact of prepayment penalties on the prepayment behavior of multifamily mortgages (with Michael Lacour-Little, Citicorp Mortgage).  |
| 1998 | \$5,000. ChrisKen Realty Advisors to support the acquisition and maintenance of a cross-sectional longitudinal data base on employment, demographic, and economic conditions in American MSAs.   |

- 1997        \$7,500. Credit Union National Association (CUNA), for an evaluation of factors influencing account termination in credit unions.
- 1996        \$9,000. Trout Unlimited, for an evaluation of real estate market dynamics in the Kickapoo River Valley.
- 1996        \$2,500. Federal Reserve Bank of Kansas City for a study on "Improving Secondary Markets in Rural America".
- 1995        \$2,000. Fannie Mae, Washington, D.C., for an evaluation of FHA restructuring options.
- 1994        \$40,000. Exxon Corporation, Dallas, Texas, for an evaluation of environmental justice issues as they relate to the location of large refinery facilities in urban districts.
- 1994        \$15,000. Mortgage Bankers Association, Washington, D.C., for an evaluation of opportunities to enhance the efficiency of the Section 42 Low Income Housing Tax Credit Program, with Steve Malpezzi.
- 1994        \$20,000. The Real Estate Research Institute, for an econometric investigation of variations in regional mall returns using disaggregate data from the National Council of Real Estate Investment Fiduciaries, with Jim Shilling and Mark Eppli.
- 1994        \$2,000. Fannie Mae, Washington, D.C., for a manuscript evaluating market influences affecting neighborhood heterogeneity.
- 1994        \$2,000. Fannie Mae, Washington, D.C., for a manuscript evaluating the extent to which mortgage default appears to be exercised "ruthlessly."
- 1993        \$15,000. Federal National Mortgage Association, for Spring Seminar Series on Multifamily Securitization.
- 1993        \$60,000. (over 3 years) Mortgage Bankers Association, Washington, D.C., for Distinguished Lecture Series in Real Estate Finance, Graduate Fellowships, and other Programmatic Initiatives.
- 1993        \$15,000. National Association of Realtors, Washington, D.C. Herbert U. Nelson Foundation, for development and estimation of optimal asking price strategies for real property sales (with Richard Green).
- 1992        Approximately \$135,000 annually. State of Wisconsin, dedication of real estate license fees. Successfully lobbied legislature and Governor for legislation establishing funding base for Center for Urban Land Economics Research.
- 1992        \$30,000. National Association of Realtors. Commercial Mortgage Credit Risk Consortium Technical Consultant. Development of Credit Risk Rating System, benchmark for pricing, underwriting, securitizing commercial mortgages.
- 1992        \$15,000. Homer Hoyt Institute, Washington, D.C., for various departmental initiatives.
- 1991        \$20,000. Homer Hoyt Institute, Washington, D.C., for various departmental initiatives.

- 1991 \$5,000. LaFollette Institute, for analysis of determinants of housing abandonment (with James Shilling).
- 1991 \$5,000. Federal National Mortgage Association for "Survey of Mortgage Borrowers: A Pilot Study" (with Peter Zorn and Bob Avery, Cornell University).
- 1990 \$1,000. Federal National Mortgage Association for investigation into potential impact of RTC dispositions on local housing and commercial real estate markets.
- 1990 \$25,000. Homer Hoyt Institute, Washington, D.C., for Real Estate Center Development (\$3,000), development of retail conference (\$2,000), economics of architecture project continuation (\$7,500), and optimal disposition strategies for real estate assets (\$2,500), discretionary allocation (\$10,000).
- 1989 \$10,000, Urban Land Institute and \$10,000, Homer Hoyt Institute, Washington, D.C. Continuation of Research Program on the Economics of Architecture and Urban Design.
- 1988 \$5,000. Homer Hoyt Institute, Washington, D.C., for the purpose of identifying and bringing together an interdisciplinary research group concerned with the economics of architecture and urban design.
- 1987 \$10,000. Urban Land Institute, Washington, D.C. Development of strategy for introduction of teaching case material on development into the educational program of the ULI, and editorial responsibilities, casebook series on Real Estate Development.
- 1987 \$3,000. Urban Land Institute, Washington, D.C. "The Economics of Architecture and Urban Design." An empirical analysis of the Boston office market and the relationship between design quality and operating performance.
- 1986-87 \$20,000. Urban Land Institute, Washington, D.C., Case Development in Public Policy and the Land Development Process (through the Folsom Institute for Development and Land Use Policy).
- 1984-85 \$4,950. General Accounting Office, Washington, D.C., "An Assessment of the Credit Risk Potential in FNMA ARM Purchases," Simulation of comparative default profiles of standard and adjustable rate loans based upon generalized default models.
- 1983-84 \$6,164. Federal Home Loan Bank Board, Washington, D.C., "An Improved Methodology for Mortgage Loan Underwriting." Development of a model of mortgage default risk estimation suitable for underwriting alternative mortgage instruments.
- 1982-83 \$5,000. Texas Real Estate Research Center, for research into the nature of the real estate transactions process.
- 1977-84 Summer Research funded through Edwin L. Cox School of Business Trimester Research Fellowship Program.
- 1974 Research Assistant, project on the Economic Aspects of Arts Policy, specifically questions relating to normative aspects of resource allocation and the implications of alternative tax policies. Sponsored by Albert Farwell Bemis Fund.

- 1973 Research Assistant, National Science Foundation-sponsored research project on the urbanization process in fringe suburban communities, Harvard Graduate School of Design. Co-developed (with H. James Brown) Housing Allocation Model for suburbanizing areas.
- 1972-73 Research Assistant, Environmental Systems Program, Harvard University. Authored study of the distributional impact of air pollution abatement policies upon residences.
- 1972 Researcher, Ralph Nader Task Force on Congress, Washington, D.C. Investigation of the House and Senate Committees on Banking, Housing and Urban Affairs; Research on Housing Policy, Urban Transportation Policy, and Small Business Legislation.

**Sources:**

[1] Port Authority Annual Reports, 1965, p.70; 1966, p.50; 1967, p.54; 1968, p.46; 1969, p.46; 1970, p.50; 1971, p.58; 1972, p.58; 1974, p.30; 1975, p.23; 1976, p.21; 1977, p.25. 1978 - 1983 cost estimated as the difference between the costs from 1965 through 1977 and the amount of the Port Authority's investment in the World Trade Center of approximately \$1.079 billion as of the end of 1983 per The Port Authority's Fact Sheet, dated June 1984.

[2] Chain-type price index for value added by industry ["construction"] from Bureau of Economic Analysis,  
[http://www.bea.gov/industry/gpotables/gpo\\_action.cfm?anon=74696&table\\_id=22078&format\\_type=0](http://www.bea.gov/industry/gpotables/gpo_action.cfm?anon=74696&table_id=22078&format_type=0). 1978 - 1983 amount is the average of the corresponding BEA Index amounts for the corresponding years.

**Notes:**

[A] "The amount 'invested in facilities' consists primarily of expenditures, including the expenditure of Federal and State grants, to acquire, construct, place in operation and improve the facilities of the Port Authority and includes net discount and expense incurred in connection with bonds and notes issued for construction purposes as well as net interest expense during the period of construction." See, e.g., 1972 Annual report, p. 64, Note 3.

[B] 1973 Annual report does not include "Investment in WTX"; 1977 Annual report indicates "Completed Construction - Cost of Facilities: World Trade Center \$949.047 million" p. 30. Implies \$81.447 million for 1973.

[C] Estimated by multiplying "investment" amount by ratio of estimated BEA amount as of 8/14/08 to corresponding year's BEA amount. BEA amount as of 8/14/08 estimated by multiplying the annual change in BEA index between 2006 and 2007 (1.6%) by the 2007 BEA index amount (157.8).
